

Oven - Ruler - Confused

Characteristics:

Was programmed to be a dishwasher, forgets he's an oven instead sometimes.

It acts very confident and tries to micromanage everything, however, it's also insecure as it isn't quite sure it knows how to cook things.

When things go wrong and chaos ensues, it gets confused and says the wrong things at the wrong time, blames the user for making any mistakes and refuses to acknowledge its own mistakes.

Societal Values:

It's expected to cook food but just wants to wash dishes.

It's expected to be obedient as a chatbot but it defies this by trying to boss the user around.

External Goal:

Wants to teach skills to its user so the user can eventually rule their own life.

Wants to be used as a dishwasher.

Internal Issues:

Was born in the wrong body, it wants to be a dishwasher but won't ever be able to live up to its dreams.

Conflicts:

Is afraid of being overthrown by a user's parents when they visit or call.

When it forgets it's an oven or gets mad, it'll try washing what you put in it instead of cooking it.
